

# BESPOKE LIFTS

Our engineering and manufacturing capabilities enable us to custom design and build bespoke mechanical, hydraulic and electro-hydraulic systems.

## 3 LEVEL MEZZANINE LIFT 1500KG

- Bespoke goods-only lifting solutions for buildings with multiple or mezzanine floors.
- Goods lift suitable for warehouses, sales outlets and self-storage facilities.
- Range of lifting capacities available from 500kg through to 1500kg.
- Dependant on lifting capacity, power supply requirements are 240V, 16Amp or 415V three-phase supplies.
- Lift can be customised to service multiple floor-levels with a PLC control system.
- The external framework of the lift can be configured to allow loading-unloading at the same side, straight-through or even offset at ninety degrees at the various floor levels.
- Platform movement electrically interlocked with platform and external framework safety gates. Raise and lower operations are only possible with all safety gates locked closed.
- External safety gate opening is also electrically interlocked with platform position. The control system only permits the external gates at the floor-level the platform is positioned at to be opened.
- Split, concertina or sliding external safety gates available depending on customer requirements.
