

# BESPOKE LIFTS

## WHEEL CHAIR LIFT

- The above electro-hydraulic lift was constructed to assist a wheelchair bound passenger.
- Access XL carried out all design, construction, installation and handover of the lift on site.
- The lifting height was 550mm and the capacity of the lift was rated to 350kg.
- Power supplied by 240V single phase.
- Lift call buttons provided at the entry points on the top and bottom floor level.
- Up, down and emergency stop buttons installed on the carriage.
- Perforated panels used for safety on the side panels.
- Expanded mesh on the platform surface provided a non-slip surface.
- Emergency lowering provided using a manual emergency release valve fitted on the power pack.
- Powder coated finish to enable outdoor use.
